Traditional Learning Course – Retention Problem

Majority of effort and budget that spent on developing & delivering training courses is wasted.

Why e-learning?

- More cost-effective than traditional education
- It's flexible and accessible
- Retention Rates Are Higher
- Systematic training record
- Lectures Can Be Taken Any Number Of Times

What is the deficiency of existing e-learning?

- Too long session
- Not interactive
- Lots of internal resources to maintain the platform and create online course
- All students in different level need to go through same content
- Instructors are difficult to guarantee students to learn effectively
- Training record is not detailed enough to show students competence

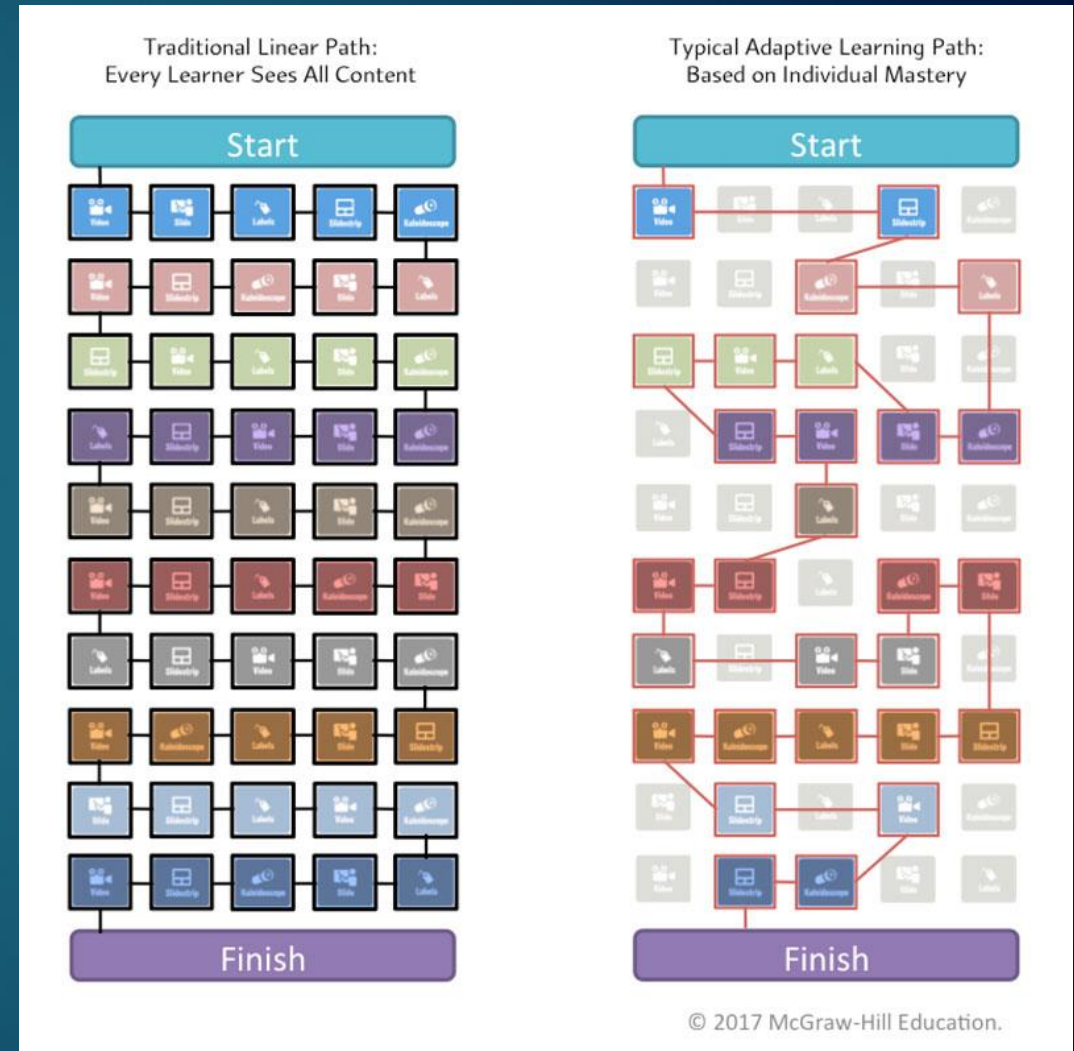

The background is a dark blue gradient. On the left side, there is a dense field of small, light blue dots. On the right side, there are several thin, light blue lines that curve and flow from the center towards the right edge, with small dots placed along their paths.

Adaptive learning

What is Adaptive Learning?

- **1 to 1 Learning** but not traditional e-learning with restricted learning path
- By using a personalized approach to replicate one-to-one interaction in a digital environment

Why Adaptive Learning?

HOW Adaptive Learning DIFFERS from Traditional E-Learning

Traditional E-Learning

The same for everyone

Content comes first, then questions

Ignores what the student already knows

Starts from the beginning every time

Learner responsible for retaining new knowledge

Demotivated students because content doesn't feel relevant or personal

AI Powered Adaptive Learning

Adapts to the individual

Only shows content when it's necessary

Takes into consideration what the student already knows

Follows up on only what the student is having trouble with

AI helps learner to retain new knowledge

Highly personalized content keeps students motivated

Webinar on Nursing Education Training

Hong Kong Society for Nursing Education

Mission: To achieve excellence in nursing service through the enhancement of quality nursing education

Webinar on Adaptive Learning on Nursing Training

Date: 25 November 2020

Time: 19:00 – 20:00 (HKT)

Venue: Online via Zoom

Speaker: Dr Khurram Jamil, MD

President – Strategic Initiatives, Area9 Lyceum

Speaker: Khurram Jamil, MD, President – Strategic Initiatives, Area9 Lyceum After earning his medical degree in 2002, he chose to advance health care outside the clinical area. He co-founded Area9 in 2006, partnering with McGraw-Hill to deploy adaptive learning technology. Since then, more than 30 million students have used LearnSmart & SmartBook (property of McGraw-Hill Education – acquired in 2014). At Area9, which is a global learning technology company, Khurram focuses on regional expansions, joint-ventures and partnerships, as well as oversees projects for all levels of education and training. His entrepreneurial experience extends over 20 years. He has led dozens of teams comprising of medical professionals and educational scientists, spearheaded large development and partnership efforts, and managed multi-million-dollar educational software development projects. Dr. Jamil is a cultural bridge builder and is involved with various cultural & art organizations to support building creative and reflective societies. Amongst these, he serves on the Education Council of the Center for Global Education (CGE) at Asia Society. Full Bio:

Learning on Nursing Training

Why Area9 LYCEUM?

- achievements in learning technologies

User-friendly Platform, Interactive Content

Easy access and creation of content, enabling frequent updates and deployment.

The image shows a laptop screen displaying the MedSim Rhapsode Curation platform. The interface includes a table of contents on the left and a list of content items on the right. Three blue callout boxes highlight specific content types: 'Adaptive learning Reading, lectures, studying' points to 'Adaptive Learning Introduction'; 'Activities, Simulations, Problem solving, Hands-On' points to 'Interactive'; and 'Experience' points to 'Experience'. A white callout box on the right lists various content types: MCQ, SLIDE, FILL, LABEL GAME, VIDEO, READER, BOOK, SIMULATION, MATH, RECORD, PROGRAMMING, ACTIVITY, and EXPERIENCE.

UNIQUE PATHS TO PROFICIENCY

Learner 1

100% proficient
8m 25s

Final

Learner 2

100% proficient
19m 39s

Learner 3

100% proficient
33m 40s

Initial

88% correct
9% consciously incompetent
3% unconsciously incompetent

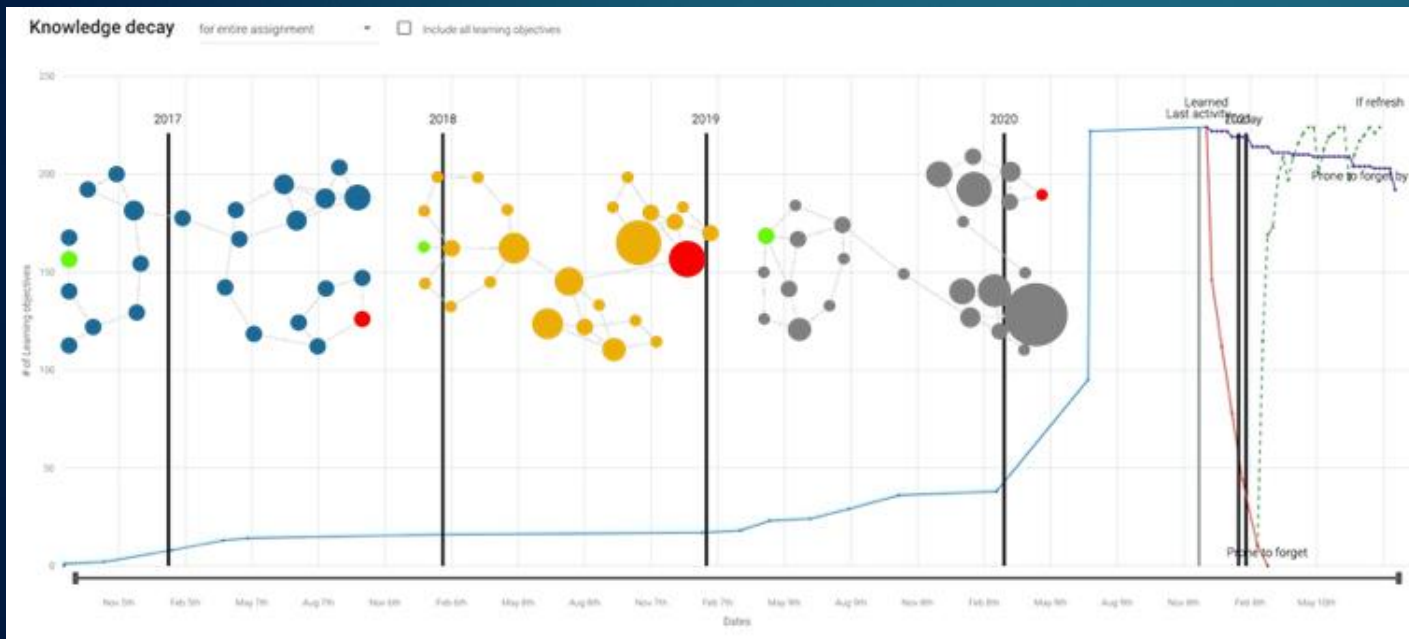

52% correct
7% consciously incompetent
41% unconsciously incompetent

47% correct
29% consciously incompetent
24% unconsciously incompetent

The Adaptive Principle

Recreates **at scale** the optimal teaching **approach of a one-on-one personal tutor**.

Reinforcement (Refresh)

Reinforcement (Refresh):

Reduced memory decay is secured by personalized (future) revisits and retraining of most critical learning objectives.

Training

I KNOW IT

THINK I KNOW IT

NOT SURE

NO IDEA

Unconscious Incompetence:

When learners are certain (confident) that they know something, when in fact they are wrong.

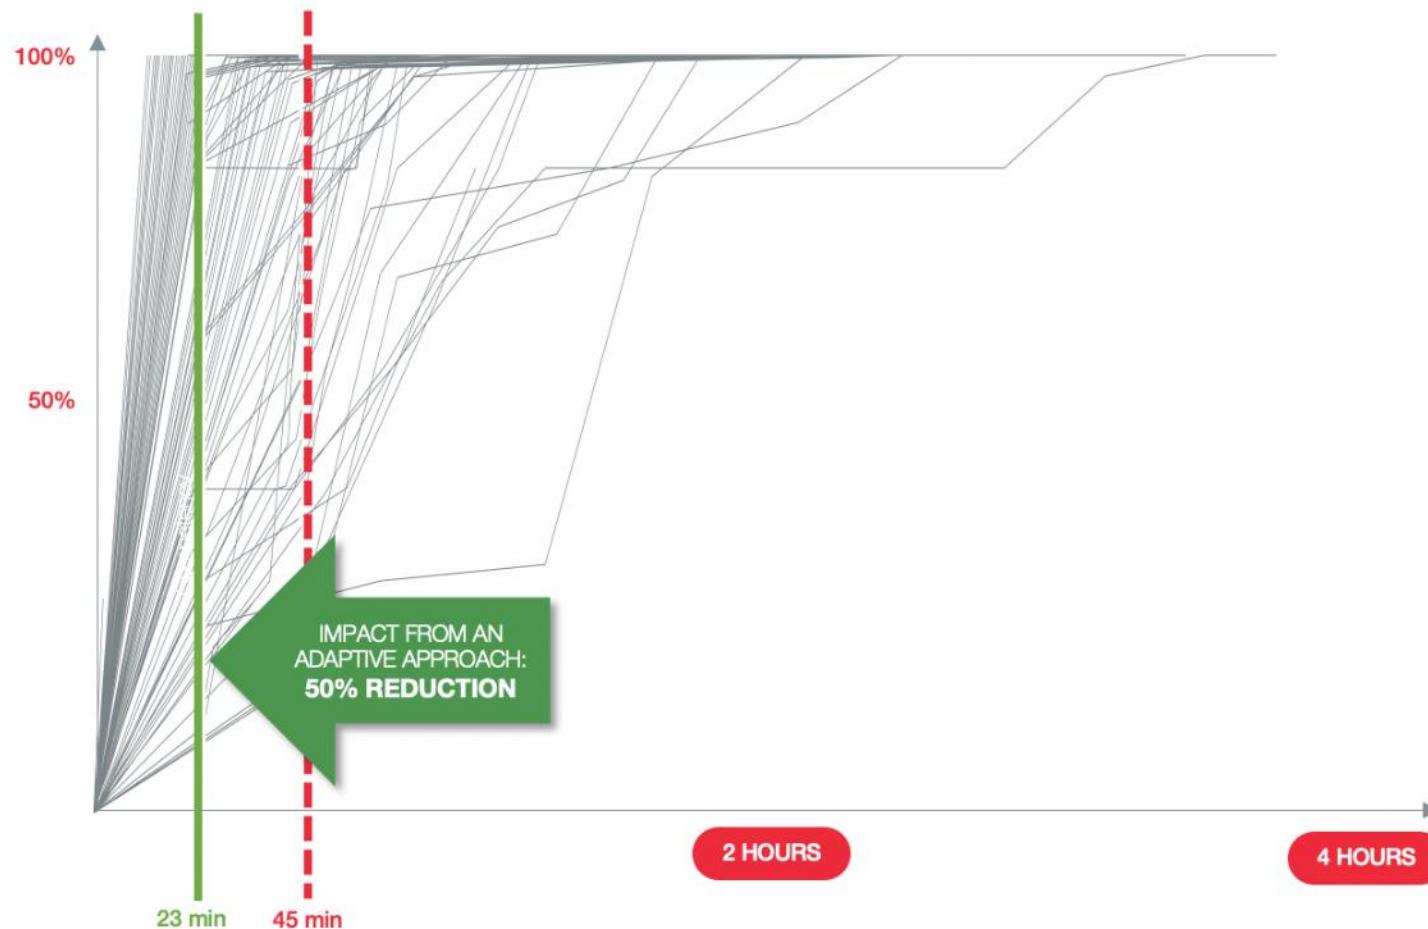

Fast Identification and Elimination of Misconceptions:

Misconceptions are immediately captured, remediated for, and later reinforced via the Refresh function.

Accelerated Learning

Uses **AI** and **intelligent technologies** to adjust and deliver optimal learning experiences in real time.

HIGH IMPACT – HIGH RELIABILITY

- 50% faster learning initially
- Up to 10 times faster refresher learning
- Empowers teachers to focus better
- Everybody succeed

Analytics

Granular tracking, people performance

Granular tracking, content performance

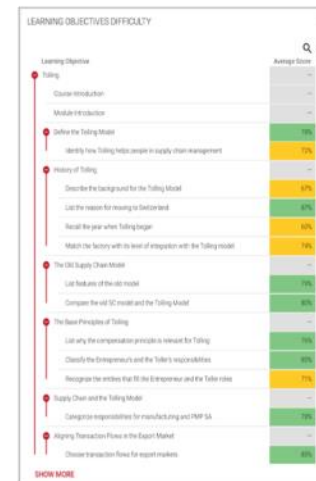

Group Competency Performance

PEOPLE PERFORMANCE ANALYSIS: ARE OUR PEOPLE AT RISK?

Module 1

Module 2

Module 3

CONTENT PERFORMANCE ANALYSIS: ARE OUR PEOPLE LEARNING OR DO WE NEED TO IMPROVE THE MATERIAL?

Case Studies

The New England Journal of Medicine

CLASSROOM > DIGITAL > HYBRID

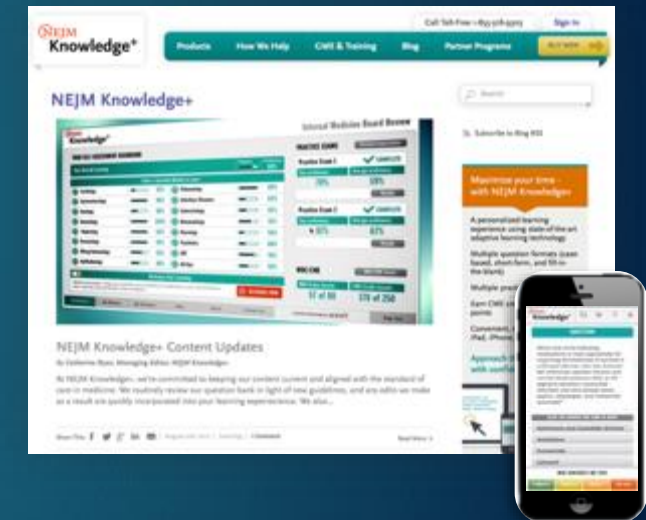

AMERICAN HEART ASSOCIATION 2002 -

NATIONAL SAFETY COUNCIL 2015

NEW ENGLAND JOURNAL OF MEDICINE 2013 -

Reduced a 2-day face to face course to 3-5 hours using digital learning and simulation. Millions of health providers have to date used these products to get there ACLS and PALS mandatory certifications in the US (ACLS = Advanced Cardiac Life Support, PALS = Pediatric Advanced Life Support)

Reduced a 3 days classroom training to 16 modules of Adaptive courses. The average time to proficiency for the Supervisor Safety Development program is 10 hours but the best students managed to get through in only 4 hours

NEJM Group and Area9 partnered in February 2013 to create the first-of-its-kind platform with smart technology that **adapts to clinicians' learning goals, pace and knowledge gaps** to deliver the information they need to know.

Ground School Training for Aviators

- Lockheed Martin Jet Pilot Training Study: **63% in the blended learning (adaptive learning) vs 29% in pure classroom group passing test 10 weeks later**

Figure 8. BL group MCQ & FIB immediate exam total (yellow) versus 10 weeks later (green)

- blended learning offers a path for improved knowledge retention
- benefit trainees in subsequent training

How Adaptive Learning helps YOU in Teaching and Learning?

Instructors

- Spend less time on providing lecture
 - Focus more on discussion, experience sharing, interaction in tutorials
- More efficient to identify the topics that students spend more time to study
 - Detailed training record to know students' competence and learning progress

Students

- Reduces 50% of time spent on learning
 - More engaged in learning
- More prepared for the instructor-led session
- Focuses prioritized refresh content right before it might be forgotten

Thank you!
